WORK EXPERIENCE

Freelance Web Developer   January 2024 - Present

- Developed a wedding planning/directory website using Laravel, Tailwind CSS, and jQuery.
- Translated front-end design documents and requests into a finished product.
- Collaborated with UX, marketing, and management roles to develop plans for new features and revisions for the website.
- Implemented 3rd party APIs from services such as HubSpot and Google.
- Collaborated with other members of the team to perform testing and debugging.

Co-Founder/Developer   July 2022- July 2024
RBXIDLE, LLC

RBXIDLE is a desktop application that monetizes a user's idle bandwidth and computing power in exchange for virtual rewards.

- Designed, developed, and managed websites created with Laravel.
- Developed a desktop application with Electron supporting dynamic workloads through Docker containers.
- Developed a WebSocket server to manage users and workloads with Node.js and Express.
- Developed the front-end of websites using CSS, Bootstrap, and jQuery.
